24 November 1949

Bluebird Team

Medical Summary ~~CONFIDENTIAL~~ File No.: B#2 - 1, 2, 3, 4

The drug used in this case was Sodium Amytal intravenously, 5% solution given at the rate of 1 cc a minute. The total amount administered was 16 cc or 0.8 gm. The stimulant was Benzodrine, 20 mg, 2-5 cc intravenously. A total of 9 cc was given or 36 mg.

The injection was started at 1141. At 1152, after the administration of 11 cc of Sodium Amytal solution, the Subject said his head felt woozy. At 1155, he was nearly asleep but awakened with a start upon being aroused. From that time on, he was occasionally given 1 cc more of the solution in order to maintain the proper state for the technique. At 1230, he was again asleep but easily aroused and the same at 1245.

F The desired effect of the medication was obtained. The Subject was violent upon occasions during the transference, at which time, he was convinced that the interrogators were ~~CONFIDENTIAL~~. At 1250, the stimulant was begun and although he gradually awakened, at 1259, after the administration of 7 cc of Benzodrine solution, he said that he still felt sleepy. He was given 2 cc more at 1303. At 1353, he was awake. At 1404, he was sent to eat and then sleep. He said he still felt a little dizzy.

The desired effect of the medication previously mentioned was obtained. The Subject had no suspicion of other than the use of the medication to help him in connection with the U. V. machine.
